

Tussa enhances its offerings with 24/7 cyber security solution

Client Profile

Tussa IKT is a subsidiary of the Tussa Group. Tussa IKT is a total supplier of IT services and delivers IT solutions based on Microsoft Azure's cloud services and its own data centre in Ørsta. The company is also ISO-certified in environmental management and IT security, delivers IT security services and has a professional service desk. Tussa IKT's own fibre network covers southern Sunnmøre, Stryn and Stranda, where fibre is being rolled out to households and businesses. The company has offices in Ørsta, Ålesund, Åndalsnes and Stryn.

Tussa IKT, part of the Tussa Group, provides IT solutions to corporate customers in Norway, specializing in operations and hosting. However, a few years ago, Tussa recognized the need to upgrade its offerings by increasing the focus on security services. To ensure customers felt secure and stable in their IT environments around the clock, they needed a partner. After thoroughly evaluating various companies, Tussa decided to visit NTT Security's Security Operations Center (SOC) in Gothenburg, Sweden. They were instantly impressed, and after a thorough evaluation process, fully convinced they had found the ideal partner for cyber security - a true leader in Managed Detection and Response services. This collaboration has been fundamental in enhancing Tussa's IT solutions, allowing them to offer enterprise customers a unique, secure, and stable service.

Challenge: A need for improved cyber security

In a world with increasingly complex cyber security threats and new risks, staying ahead of cyber criminals is crucial for Tussa's customers. A security breach could have significant business implications, making it essential for Tussa to provide the best possible protection. This allows their customers to focus on their business, knowing their data and IT environments are being monitored 24/7 for potential threats.

“ Our customers, both large and small businesses, need a secure and reliable IT solution. By integrating a market-leading cybersecurity solution from NTT Security, they now receive just that

Ivar Driveklepp, CEO, Tussa IKT

Solution: Building a strong partnership

During their meetings, Tussa and NTT Security realized they were a strong match and work according to the same values, with quality being at the forefront. Their businesses complement each other in an innovative way that provides customers with stability and security. This partnership now enables Tussa to offer 24/7 cyber security management from NTT Security to its corporate customers.

"Our customers, both large and small businesses, need a secure and reliable IT solution. By integrating a market-leading cybersecurity solution from NTT Security, they now receive just that," says Ivar Driveklepp, CEO at Tussa IKT.

Seamless onboarding

Tussa's employees have been trained to seamlessly onboard clients to NTT Security's SamurAI platform. This platform integrates with most standard security products, enabling them to leverage data from clients' existing infrastructure along with NTT's advanced threat intelligence. With AI-driven capabilities and support from highly skilled security analysts, potential threats and incidents are being detected and stopped before they impact the client's infrastructure.

"One of the biggest advantages of the SamurAI platform, is how easy it is to connect to. The level of the employees' cyber security competence felt very reassuring. Since cyberattacks can happen at any time, it's crucial to be able to stop them quickly with professional help. Our clients now have that capability thanks to NTT Security's services and cybersecurity specialists," says Ivar Driveklepp.

Enhanced service offerings and Incident response

Through the partnership, NTT Security expands its presence in the Norwegian market while Tussa gains credibility with its customers by working with a professional player in cybersecurity. A strong collaboration that creates synergies for both companies.

Since cyberattacks can happen at any time, it's crucial to be able to stop them quickly with professional help. **Our clients now have that capability thanks to NTT Security's services and cybersecurity specialists.**

SamurAI Managed Detection and Response (MDR)

As part of Tussa's offering, they now can support clients with 24/7 monitoring from the SOC based in Gothenburg, Sweden.

SamurAI Incident Response (IR)

Through this close co-operation between specialists from both NTT security and Tussa, cyber attacks can be instantly detected and stopped.
